

Aric Dromi

Futurologist, Digital Philosopher and Professional Troublemaker

CSA CELEBRITY SPEAKERS

Aric Dromi is proud to explain that he built his career on things that he knew that he didn't know, and always took an assignment that pushed him to explore new fields, tools and methods that would redefine his vantage point on any given challenge.

"Turning Science Fiction into Reality"

In detail

Aric splits his time between his role at the in-house futurologist at Volvo cars, sitting on the advisory board of NTT Innovation Institute (part of the NTT Group, ranked 65th in Fortune Global 500, NTT is the third largest telecommunications company in the world) and running his company; where he travels the world and changes the way we experience the world, the way we think about thinking and transforms the way we understand change. He is also on the Innovation Advisory Board of UNLEASH, a global innovation lab that brings together people from all over the world to transform 1,000 personal insights into hundreds of ideas, and build lasting global networks around the UN'S Sustainable Development Goals. Aric thinks laterally and is often the first person in a team to see how widely different aspects of a problem or opportunity can play together and form a new concept or reality; in other words a genuinely innovative thinker.

What he offers you

Aric Dromi's sessions are designed to help organisations and individuals better understand change and his vision of a digitally enabled autonomous future. He educates, inspires and empowers new thinking patterns. He delivers captivating speeches that frame questions and help people identify and abandon old paradigms and rethink thinking.

How he presents

A passionate and engaging speaker, Aric's presentations are a veritable wealth of new ideas delivered in a unique and highly creative way.

Languages

He presents in English.
